Web Development Midterm Proposal

Section D Yu Meng

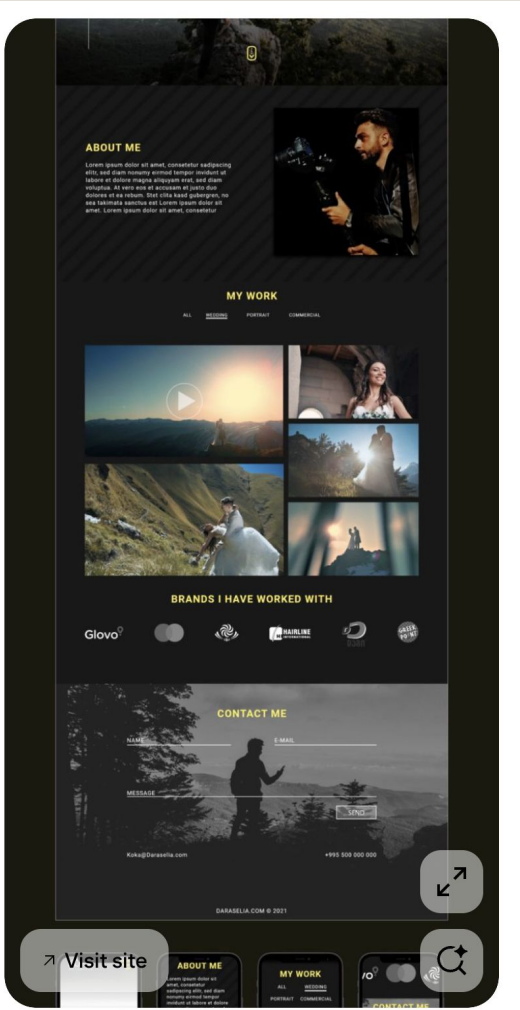
Theme: Photography

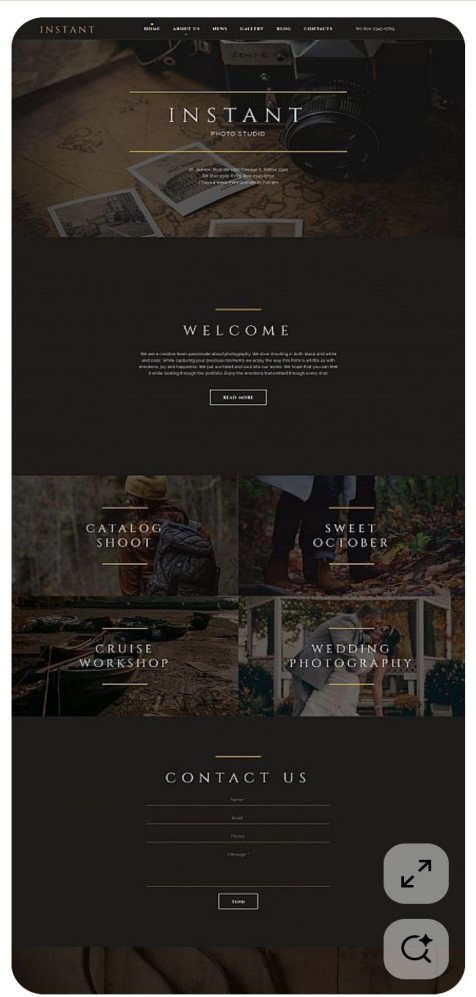
More specifically: A beginner photography website

Name: Learning to See

My problem was not ***pressing the shutter***. It was ***not knowing what to look at*.**

This website documents my process of training my eyes and remembering how I learned to observe.





- Dark themed portfolio websites
- Clean and minimal layout
- Text appears over images
- Cinematic feeling

Already Learned:

- HTML structure
- Semantic elements
- Navigation layout
- CSS styling like color control
- Positioning like relative and absolute
- Image transforms
- Basic gallery layout

Need to learn:

- More advanced gallery layout using CSS
- Smooth transitions for hover effects
- Overlay text techniques
